

About Zeligate:

Zeligate empowers teams by providing them with the world's first workforce of AI helpers so employees can delegate tedious tasks, and do more meaningful work. Zeligate helpers are highly interactive and are designed to learn to become part of the team.

Helpers can be assigned tasks by voice or text without interrupting workflows, and can reliably act as assistants for a variety of roles. From generating job listings, evaluating resumés and calling candidates, to posting ads, and automatically emailing calendar invites, people use Zeligate technology to unlimit their time, regardless of their title.

Founded in 2023 by Denver Naidoo, Zeligate is on a mission to help people unlock their creative potential. With AI tools to manage the mundane, Zeligate frees up more energy for humans to be better at what we do best: thinking, communicating and innovating.

Key Zeligate features include:

- Generate, post and advertise new job listings using AI assistance
- Rapidly evaluate resumés, rank candidates and produce applicant summaries
- Automate calls and speak to candidates to schedule interviews and automatically send calendar invites
- More to come!

About Denver Naidoo, Founder & CTO, Zeligate

Denver is the CTO and co-founder of AI workforce provider, Zeligate. Based in Brisbane, Denver has founded and exited multiple startups, and has served as an architect and senior technology leader over the past two decades.

Since childhood, Denver has maintained a passion for emerging technologies which he has carried throughout his career, including completing his Bachelor's Degree in Computer Science from London. Inspired by the possibilities for tech to unlock more of our human potential, Denver developed his expertise in AI and machine learning, which ultimately sparked the vision for Zeligate. As the CTO of Zeligate, Denver seeks to use AI to empower people to be the best they can be.

Denver can speak to:

- The Zeligate journey and the future of the platform
- The future of work and the 'Workforce 2.0'
- AI's power to 'unlimit what's humanly possible'
- Productivity and new technologies in the world of HR and beyond
